

Adjusting program settings

To adjust Karaoke Creator settings, select **Settings** from the **Tools** menu.

- **Lyrics Editor**

- Lyrics editor font: Choose the font used in lyrics editor, this matters when using complex character sets
- Cursor width (pixels)
- Current code page: This will be used to convert text files
- Right-to-left reading order: Change to switch to right-to-left writing mode
- Color scheme: Use this button to open the **Lyrics editor colors** window, where you can edit the colors used in the lyrics editor. You can choose from predefined schemes or define and save your own.

- **Soundtrack View** This section defines the look of the panel on the left side of the screen where the current soundtrack is displayed
 - Label font: The font used to display the labels over the soundtrack
 - Pointer width (pixels): Width of the soundtrack pointer
 - Label detection sensitivity: When moving a mouse, labels will be detected when cursor is within this distance
- **General**
 - Update events when changing settings: When you change settings like resolution or colors, all events used in song will be scanned and updated
- **Synchronization**

- Synchronization response delay (ms): When synchronizing, this time will be subtracted from the time you actually press a space bar
 - Synchronization preview accuracy (times per second): This controls how often the text will be updated when playing back
 - Disable cursor update during playback: When enabled, cursor will not move
 - Don't change position when selecting word: By default, when you click on a word in lyrics editor, cursor will move in the soundtrack to the beginning of that word. You can disable it.
 - Loop playback when dragging labels: During playback, when you click and drag a label in a soundtrack view, playback will loop around the position you are dragging
 - Margin before label (seconds): 1.0
 - Margin after label (seconds): 0.5
 - **Updates**
 - Check for updates
 - Check for news
 - Check for updates now: [Click here to check for updates immediately](#)
 - **Varia**
 - Animate shortcut bar
 - Run song wizard on startup
 - Convert MP3 to temporary WAV files: You may automatically convert all MP3 files to WAV
 - Prompt to change to vocal removed for karaoke: No
 - When dropping MP3 file: You may choose between loading a soundtrack and starting AI synchronization
 - Show message for removing duet clear screens: No
-
