

Create a song with AI

Step-by-Step Tutorial: Creating a Song with AI in AI Karaoke CD+G Creator

Follow these simple steps to create your karaoke song using AI features in Karaoke CD+G Creator. This tutorial walks you through the process from importing the MP3 file to creating the final CD+G file.

[This tutorial is also available in video format on YouTube.](#)

1. Open the MP3 File

1. Launch the **AI Karaoke CD+G Creator** program.
2. Drag and drop your MP3 file into the program window.
3. Select **Start AI Synchronization** when prompted.

2. AI Synchronization

AI Synchronization window will open

AI Synchronization

Song:
C:\Users\Piotr\...\Bit Bangers - Miles Between Us.mp3

Load...

 or drop MP3 file anywhere in this window
Use high quality audio and make sure that you have not removed vocals
Make sure that lyrics match the text in the song as closely as possible.
Artist:
Title:
Vocal remover: ☒ Normal ☐ Best
Processing mode: ☐ Normal ☒ Detailed ☐ Alternate
Project folder: ...

Processing modes marked with italic need to download files from the internet.

Download will start automatically before processing.

Lyrics:

The sun is fading, shadows start to grow
You stand there silent, afraid to let me go
My bags are packed, the engine's running
But I see the fear behind your smile
And I don't wanna leave you all alone
But there's a path that I've gotta roam
So hold on, darling, through the stormy nights
I'll be thinking of you in the fading light
Though the road is long, and I'll be far from home
My heart will always be where you are
I'm never too far, I'm never too far
From you, from you
The highway's calling, and I feel the weight
Of promises made and the dreams we chase
But every mile takes me farther from your arms
Still, I'll carry you inside my heart
And I don't wanna leave you in the cold
But there's a path that I got to roam
So hold on, darling, through the stormy nights
I'll be thinking of you in the fading light
Though the road is long, and I'll be far from home
My heart will always be where you are
I'm never too far, I'm never too far
From you, from you
From you
So wait for me, when the stars don't shine
When the world feels heavy, just know you're mine
I'll come back to you, no matter how far
We'll close the distance between our hearts

Import from file... Paste from clipboard

Search the web Clear

OK Cancel

1. AI Synchronization Window Overview:

- **Song Details:** The program extracts these automatically from the MP3 file.
- **Lyrics:**
 - If embedded in the MP3 file, they load automatically.
 - If not, download the lyrics from the web or paste them manually.

Tip: Ensure the lyrics match the song exactly for accurate synchronization.

2. Set Parameters:

- **Vocal Remover:**
 - Choose **Normal** for faster results or **Best** for higher quality.
- **Synchronization:**
 - **Normal:** Fastest option; suitable for quick tasks.
 - **Detailed:** Recommended for the best results (slightly slower).
 - **Alternate:** Use if "Detailed" doesn't give ideal results.

3. Project Folder:

- Choose where to save the project.
- The program auto-generates a name based on the artist and title.

4. Optional: Fine-tune settings using the **Settings** button (defaults work well for most cases).

5. Click **OK** to start processing.

Processing Time:

- On an i5 processor: 2–3x the song length.
- On an i9 processor: About 2x the song length.
- With a GPU: Around 1/5th of the song length.

3. Apply Styles

1. When prompted, choose to open the **Styles** window.

Styles

Song

Title: Off-key love Credits: Created with AI Karaoke Creator www.powerkaraoke.com

2. Choose from the preset styles to enhance the appearance of the CD+G file.
3. You may choose different styles for lyrics, title and credits screen. Use song details section to enter appropriate information to appear on these screens.

4. Check Synchronization

1. Reject prompt to create a CD+G file, as it is a good idea to review the results of synchronization first

2. Use **Play** button to listen to the song and check if lyrics are synchronized.
 - Preview the song's **Primary Track (Original Song)**, **Vocal Removed (Music Only)**, and **Vocal Only (Singing Only)** tracks.
 - Listen to the **vocal-only track** for precise alignment.

5. Create the CD+G File

1. Click the **Create CD+G File** button.

Create CD+G File

Files:

Soundtrack: Primary: D:\Documents\My Karaoke\AI\...\Bit Bangers - Living here and now

Output file: D:\Documents\My Karaoke\...\Bit Bangers - Living here and now.bin

Output type: BIN (to record on a CD)

Help

- Configure CD+G settings:
 - Choose appearance
 - Select format (BIN or CDG)
- Click **OK**.
Processing Time: This should be very fast

6. Review Your Karaoke CD+G File

- The final CD+G file will open automatically.
- The CD+G file includes synchronized lyrics, music, and any styles or customization you applied.

Tips for Success

- Ensure your lyrics perfectly match the song for accurate synchronization.
- Use the "Detailed" synchronization option for better alignment results when working with languages different than English
- Experiment with styles to create a visually appealing karaoke CD+G file.

By following these steps, you can create professional-looking karaoke CD+G files with ease using the AI features in AI Karaoke CD+G Creator!
