How to burn CD+G disc from BIN or MP3+G/CDG files on your hard disc

How to burn CD+G disc from files on your hard disc

1. Select **Burn** tab.
2. Add files you would like to burn. You ma do it using one of two ways:
   - Drag BIN or CDG files and drop them on Power CD+G Burner window
   - Click **Add** button and select the files you would like to burn
   - Power CD+G Burner supports follow types of files:
     - **BIN** files (they contain both graphics and autio)
     - **CDG** files, also know as **MP3+G** (CDG files contain graphics only, audio needs to be in MP3 or WAV file with the same name, located in the same directory as CDG file)
     - **ZIP** files that contain pair of MP3 and CDG files
     - **MCG** files
     - **KMA** files

3. If you would like to change the order of the songs on the disc, select the song you would like to move and use **Move Up** and **Move Down** buttons to change its place.
4. Now you may change the key of the song -- to do this right-click the song and select **Change Key**. In the dialog box enter a value in semitones to modify the key of the song. It is possible to change up to 12 semitones

5. Power CD+G Burner needs temporary disc space to create image file. It there is no enough space please free some or select different drive for temporary folder location.**Now you are ready to burn your disc.**
6. Select burner device.
7. Insert blank CD into burner drive.
8. Click **Burn.**
    - Burn process consists of two phases: image file creation and actual burning.

If burning phase is causing problems please see **Troubleshooting**.
